Intelsat FlexExec
Reliable Inflight Communications Wherever You Fly

The Flexible Inflight Connectivity Solution Designed Specifically for Business Aviation

The FlexExec Difference

Built on a global space and ground network supported by 99.999% availability

Scalable, adaptable plans to meet unique and evolving connectivity needs

Delivers speeds as fast as 50 Mbps to enable various voice and data applications in the air

Comprehensive, end-to-end security backed by SOC 3 accreditation

Whether flying for business, pleasure, or a little of both, you need confidence in knowing that passengers and flight crew can seamlessly connect to and enjoy a high-performing internet experience from the sky anytime, anywhere.

Intelsat FlexExec is a fully managed satellite connectivity solution powering reliable high-speed internet connections when you fly, no matter where.

Dedicated and Reliable

Designed specifically for business aviation using Intelsat's global, high-throughput Flex network, FlexExec provides dedicated bandwidth not shared by commercial aviation or consumer broadband users.

FlexExec is supported by a global, multi-layered/multi-beam high-throughput satellite network, Satcom Direct's Plane Simple® advanced tail mount antenna, and a cutting edge fiber-based network on the ground. This gives passengers and crew the confidence that internet connectivity is always ready and always on.

Flexible and Robust

Together with our exclusive partner Satcom Direct, we have designed a custom-fit connectivity solution to meet the unique budget and flying needs of business jet owners and fleet operators.
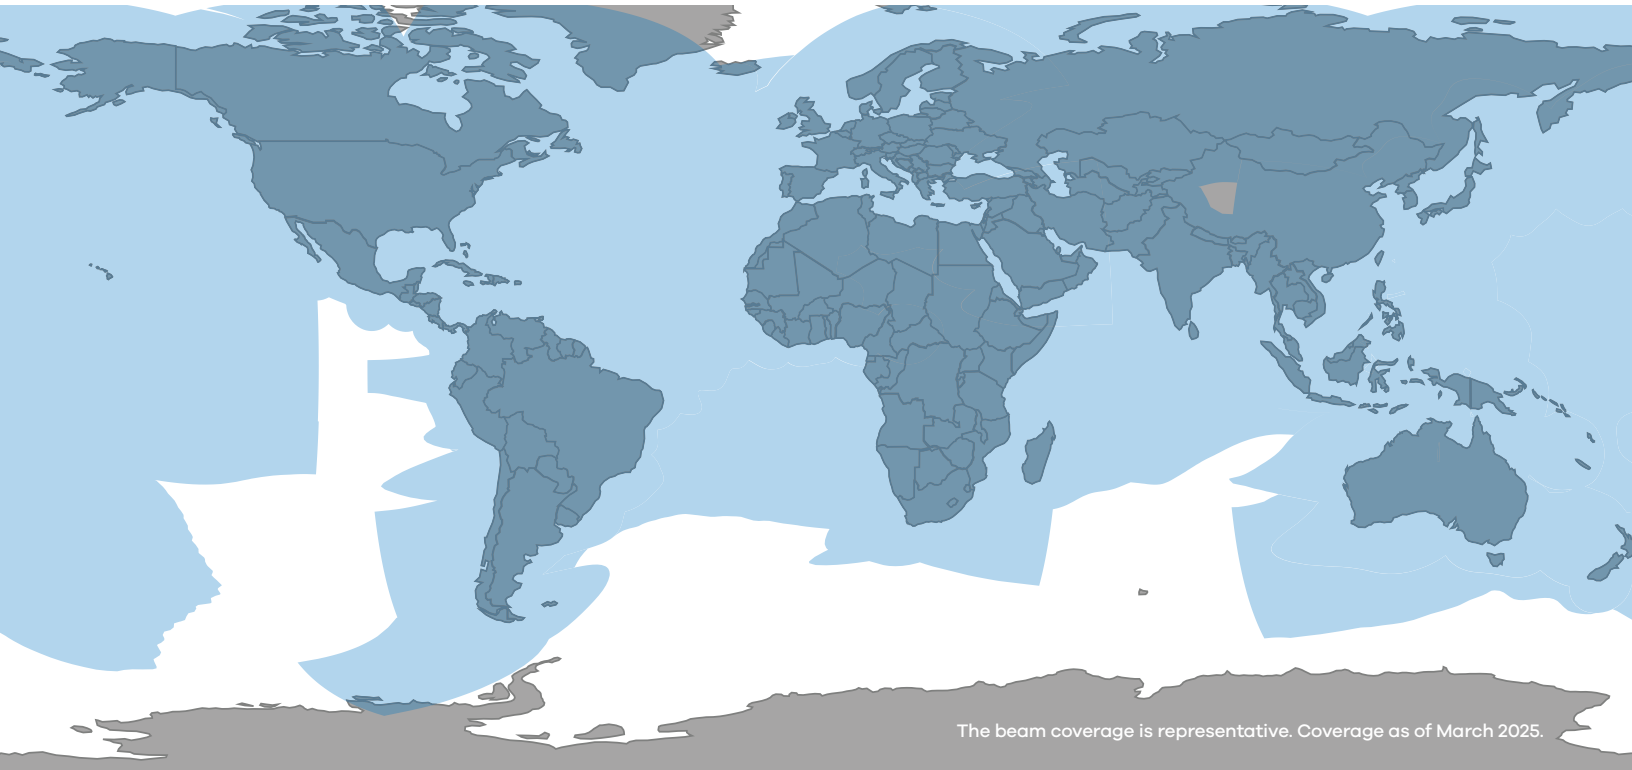

FlexExec enables Satcom Direct to provide a portfolio of flexible service plans to suit your changing operational needs:

- **Global Access Pay As You Go.** Faster broadband. Competitively priced. No monthly commitment or activation fee.

- **Global Access Monthly Fixed.** Fixed monthly subscription. Smaller volume GB plans.

With Intelsat FlexExec passengers can enjoy uninterrupted connections for streaming, cloud-based applications, large file downloads and email, even on high traffic routes.

INTELSAT

Intelsat Flex Network Coverage

The beam coverage is representative. Coverage as of March 2025.

Delight Your Passengers with Intelsat FlexExec

Combined with Satcom Direct's Plane Simple advanced tail mount antenna, FlexExec delivers a seamless, high-speed internet-in-the-sky experience to business jet passengers everywhere they fly. Why fly anywhere without it? Contact us today to equip your aircraft or fleet with inflight connectivity that will delight your customers.

A Partnership Committed to Service Excellence

Together with Satcom Direct, we are advancing inflight internet for business aviation through hassle-free, end-to-end managed solutions. Offered exclusively through Satcom Direct, FlexExec has you covered no matter how your connectivity needs evolve.

Building a Bold New Future for You and Your Customers

Grow with us as we launch new capabilities designed to handle the immense amount of data demand to come over the next decade. Currently in development, our next-generation network will be multi-orbit, cloud-based, fully virtualized, and software-defined – delivering a frictionless connectivity experience anywhere in the world.
